AC9000E Portable Air Conditioner with Heat Pump for rooms

Please Note: All air conditioners must be vented through a window or a door so the hot air removed from the room can be expelled. The ideal solution is to vent through a window. To make sure the warm air does not come straight back in, this air conditioner comes with a venting hose and a window venting kit supplied in the box so you can start cooling down straight away! The provided window kit

JabiruEngine Archive digest vol au Matronics

Thanks Gary, power to the argument for hot air carb heat. I forgot to mention I do use carb heat as I reduce power below 2000. I'd feel lost without it but as Gary's says and my experience is, ice forms best at low revs when there is the biggest pressure drop across the carb. Remembering of course, foggy misty days are not necessarily the worst days for carb icing conditions.
